

FORRS Corona Protective Measures

Hygiene concept

To protect our visitors and our employees, FORRS will apply a hygiene concept at the e-world 2022 trade fair including the following measures:

- FORRS e-world team members are advised to avoid contact with large gatherings of people days before the trade fair (in the office as well as in the private environment).
- Our team will present 2G proofs which will be valid at the time of the fair.
- All team members will be tested multiple times on the days of the trade fair. The testing concept for our FORRS team will moreover already start three days before the trade fair.
- Throughout the time at the trade fair, our employees are advised to wear an FFP2 mask where appropriate. We will also have masks available for our visitors upon request.
- The FORRS booth at the fair will be equipped with sufficient disinfectants, which the FORRS team will use regularly, as well as visitors can use regularly.
- Surfaces at the FORRS booth are regularly cleaned and disinfected
- For the catering, we have chosen a Covid protective solution. We use one-time-use dishes, bottles, and cups.
- We will take care to avoid large gatherings at our booth. In an unavoidable situation of a larger number of visitors at our booth or in dialogue with FORRS team members, we will move to further, less frequented areas.
- We will consistently observe the hygiene concept of the organizer (see also <https://www.messe-essen.de/essen-fairground/coronavirus/>) and implement all aspects of the official concept.
- Should you have any suggestions for further important measures, we would, of course, be pleased to receive your proposals and will be happy to consider them.
